

TIFANA ROSA TAFTAZANI

CYBERSECURITY PROFESSIONAL | FULLSTACK WEB DEVELOPER

C.F. Møllers Allé 98, 2300 København | tifanarosa@gmail.com | +45 81912876

After a few years in full-stack development, I discovered a strong passion for cybersecurity, drawn by its dynamic, attention to detail, and problem-solving orientation. My background in programming combined with a curiosity for securing digital environments, led me to pursue formal cybersecurity training. I have completed the SANS SEC275 course and earned the GIAC Foundational Cybersecurity Technologies (GFACT) certification. I am currently deepening my expertise through the SANS SEC401 course and preparing for the GSEC certification.

With a solid foundation in development and a growing skill set in cybersecurity, I am eager to transition into cybersecurity roles where I can apply my technical background, attention to detail, collaborative spirit, and passion for protecting systems and data from threats.

SKILLS

- Windows & Linux Command Line
- Basic Scripting (PowerShell, Bash)
- Basic System Administration & Security Network Security (Firewalls, VPNs, Wireshark)
- Incident Response & Log Analysis
- Cloud Security & Shared Responsibility Model
- Risk Management & Compliance
- JavaScript
- PostgreSQL
- HTML/CSS
- Node.js
- Ruby/Ruby on Rails
- ReactJS
- Figma
